2 I'm against the Yucca Mountain project as a  
3 site for nuclear storage. I think nuclear energy is a  
4 wonderful idea, but I think it's unsafe at the time. I  
5 think as we developed the atomic bomb during World War  
6 II, I think if there were a moratorium on the use of  
7 nuclear energy, it would mandate that a means of safe  
8 storage and use could be found. And I think this would  
9 be the best road to take now. In regard to the current  
10 waste, a safe means must be developed and I do not  
11 think Yucca Mountain is the safe place to store it.
